Program Year: 2019

Report Name: Student Outcomes - Statistics

Report Date: June 09, 2020

	Student Outcomes (Total Complete Reports: 56)					
Institution	**Graduation Rate Calculation Method**	**Num Grads**	**Grad Rate(%)**	**Placement Measurement Method**	**Num Placemt**	**Placemt Rate(%)**
Amarillo College	Graduation rates are based on cohorts as suggested by the ABFSE. The cohort that had completed 50% of their curriculum and began working on the 2nd half of the required curriculum at the same time within that year. Based on when that time was, the students would have 1.5 time (18 mo.) to complete the program 11 graduates completed the last 50% of their curriculum within the expected 18 months and 1 graduate completed the last 50% of their curriculum in 20 months (he sat out one semester) creating a 92% graduation rate.	11	92	The program has an online survey for graduates and their employers to help our research and gathering data for program planning and improvement. When gathering information to send out the survey instruments, the graduates are contacted to collect employer name and contact information. In 2019 we had a total of 12 graduates, 10 of those were gainfully employed in the funeral service industry at the time of our inquiry. The job placement was 83%	12	83
American Academy McAllister Institute of Funeral Service	AAMI creates a profile for each cohort of entering campus and online students each semester. It is updated at the end of each semester for each cohort. Students are tracked each semester until they graduate or withdraw. We calculate retention/graduation data each semester for each cohort and maintain a historical record. Data is submitted to the AAMI Board of Directors.	44	67	Students are surveyed in their last semester prior to graduation, and then once again 6 months after graduation.	107	91
American River College	The number of graduates/number of the enrolled cohort. Reported to ARC workforce development. Reported to ARC Workforce Development.	13	100	The number employed/The number in the cohort. Reported to the ARC Workforce Development	13	100
Arapahoe Community College	They are kept by the Program Chair based on above criteria. They are kept by the college by way of a report to the Records/Admissions office written by the program chair listing the students accepted to the program by name and identification number.	36	98	Based on a graduate survey asking student the question, "Are you currently enployed in the funeral industry?"	37	92
Arkansas State University Mountain Home	Graduates who complete the second half of the AAS-FUS degree (starting when they have 33 or more credit hours completed), who then complete all degree requirements within 150% of their normal time to completion (3 full 15-week semesters) are considered to have graduated on time. These data are reported to the Arkansas Department of Higher Education and IPEDS.	8	89	ASUMH surveys all graduates and determines who has secured employment in their field. Additionally, those that have continued on to additional education and/or military service are included among the employed category. Those that are employed, but not in the field of study, or those that continue to seek employment are categorized as not employed in field. Graduates are evaluated 6 months following graduation, allowing them time to search and secure employment. Those who are not actively looking, or are unable to work, are taken out of the equation. These data are reported to the Arkansas Department of Higher Education, IPEDS, and Perkins Grant administration.	9	89
Carl Sandburg College	We subtract the number of program students who complete the requirements of the program in order to graduate after completion of both sides of the national board examination.	100%	100	We review all of our graduates in order to arrive at their success and employment.	14	87
Chandler-Gilbert Community College	34 students started and 32 students finished the program and graduated, Calculate percentage. Appears to ABFSE,our website and college publications and is available at the Mortuary Science Building	32	94	Student Surveys	32	78
Cincinnati College of Mortuary Science	The percentage of students completing the program of those who began in the same class. We exclude students who withdraw the first week of class. Reported ti IPEDS and HLC.	41	93.2	The percentage of graduates eligible for and seeking an apprenticeship who actually obtain one. Excludes students not willing to relocate, along with those pursuing additional education, another career or military service. Reported to HLC as employed if within six months of graduation.	41	93
Commonwealth Institute of Funeral Service	The rate is obtained by dividing the number of graduates by the number of new students in the cohort who have completed 1/2 of the program length	111	66	The Texas Workforce Commission requires a completer form to be filled out by the student at the time of graduation. This form is collected up to 30 days after graduation to verify employment in related field.	132	79
Community College of Baltimore County - Catonsville	Since CCBC offers an Associates degree, the ABFSE Standard states that students have 18 additional months to complete the MORS Program once they have completed 50 percent of their course work. Successful completion of MORS 101 Funeral Service Principles I is the benchmark that the MORS Program uses to determine that students have completed 50 percent of their degree which includes their general education courses per the ABFSE Standard. Thus, the MORS Program reports the students who have successfully completed MORS 101 Funeral Service Principles I for cohort tracking purposes and to report the cohort to the ABFSE in their annual report. Thus, the cohorts reported in the previous ABFSE annual reports are used to calculate graduation rates for the 2019 annual report. CCBC reported 20 graduates in 2019. Using the ABFSE previous	14	70	Per Standard 11, employment rates are calculated by using student data from 6 months of graduation who are employed in a funeral related field, entered the military, or are continuing their education. Since 20 students graduated from the Mortuary Science program in 2019, our base line is 20 graduates. Of the 20 graduates, 14 of the students are actively working in funeral service. Since 14 of the 20 graduates are working in funeral service, CCBC calculated their graduation rate by; dividing 100 by 20 and multiplying the answer by 14 (100 divide by 20 multiplied by 14 = .80). Therefore, the employment rate for CCBCs graduates is 70%.	20	70

annual report data, it was determined that 14 of the 20 graduates were reported 50% completed in the 2017/2018 annual reports, 6 of the graduates took more than 18 months to graduate after completing 50% of their degree. Therefore 14 of the graduates completed their degrees within the 18 month window per Standard 11 and 6 graduates took longer than 18 months to complete their degree. The following formula is how CCBC calculates graduation rates, dividing 100 by 20 and multiplying the answer by 14 (100 divide by 20 multiplied by 14 = .70). Therefore, CCBCs graduation rate is 70%.

College	Graduation Rate Description			Employment Rate Description		
Cypress College	Number of graduates divided by the number of newly enrolled Mortuary Science students (same time period)	23	55	Number of graduates employed within 6 months of graduation divided by the total number of graduates	26	77
Dallas Institute of Funeral Service	Based on enrollment and completion statistics - these are required by statute of the Texas Workforce Commission(our approval agency). These are computed annually 9-1 to 8-31. (We use the ABFSE definition of graduation)	94	74.63	Number of employed graduates divided by the number of graduates	94	.72
Delgado Community College	Students that complete the first semester FSED courses with a "B" or better (6 semester hours) are considered in-program. Once those students attend the second semester courses they are considered in the graduation calculation.	7	64	Students who are working in the funeral service or related field 6 months after graduation.	7	100
Des Moines Area Community College	At the end of each semester, the program chair identifies all students who have completed 50% of the program of study and places those students' names on a list with the required date for them to complete the program in a timely graduation. Each semester after graduation, the program chair identifies who graduated during that semester and marks them as such.The graduation rate are those who complete 50% divided by those who graduate.	62	89	Students are surveyed at the time of graduation and asked to identify if they have a position along with the name and email address of the preceptor so we can follow up with an Employer survey.	65	86
East Mississippi Community College	Graduation rates are calculated according to 10.3.2. Students who enroll in the fall term of their sophomore year (i.e., 50% of program) are tracked to graduation for calculation of the time to graduation rate. Graduation rates for the FST programs are submitted to Federal Perkins Reports, Mississippi Community College Board, National Student Clearinghouse, and Integrated Postsecondary Education Data System (IPEDS).	4	50	Employment rates are calculated by counting the number of graduates employed by number of graduates. Data is obtained through graduate survey.Employment rates for the FST programs are submitted to Federal Perkins Reports, Mississippi Community College Board, National Student Clearinghouse, and Integrated Postsecondary Education Data System (IPEDS).	4	100
Eastwick College	Eastwick College reports programmatic graduation rates to the Accrediting Council for Independent Colleges and Schools (ACICS) on students who graduated in the previous academic year (July 1, 2018, to June 30, 2019). ACICS asks what percentage of the students who graduated during the reporting period did so at 100% and 150% of the program's length. The calculation noted below is at 150% of the program length for the ABFSE cohort of graduates who completed the program between January 1, 2019, and December 31, 2019.	13	100	academic year (July 1, 2018, to June 30, 2019). ACICS uses the following formula: (a+b+c)/(d+e)-(f+g+h+i+j+k), where,a = Placed based on job titleb = Placed based on use of skills learned*c = Placed based on the benefit obtained by the FS education in maintaining the current position or earning a promotion*d = Students who completed the program**e = Students who graduated from the programf = Health condition or death waiverg = Continuing education waiverh = Military service waiveri = Visa restriction waiverj = Stand-alone ESL program waiverk = Incarceration waiverThe calculation noted below uses the above method on the ABFSE cohort of graduates who completed the program between January 1, 2019, and December 31, 2019.* Not used in this calculation**Eastwick College does not use a Completion status in any of its programs	13	100
Fayetteville Technical Community College	Out of the 42 graduates, 31 enrolled in the initial FSE course and graduated within the 150% normal time to complete. This equates to 74% graduation rate. Our program states that all students must complete their general education course requirements prior to enrolling in any of the core FSE (Funeral Service Education) courses. We are using enrollment in the FSE 112 course as the initial funeral service course.	31	74	The number of graduates working divided by the number of graduates available to work - equals the employment percentage rate.	42	88
FINE Mortuary College	For the purpose of calculating graduation rates, students moving through the second half of the associate program will be considered to have graduated on time if they complete their degree in 18 months (6 semesters) For the purpose of this report, students are marked as half way thought the program once they have reached 33 or 35 credits (depending on how many credits the program was when they enrolled) and are considered "timely graduates" if they complete the remainder within 18 months.	34	87	Students are provided with a graduate data survey upon successful completion of all degree requirements. This is done immediately following completion. FMC considers graduates "employed" if they fall into one of the following categories: employed in funeral service/fs related field, active military or enrollment in further higher education	39	87
Florida State College at Jacksonville	Graduation rates are measured by cohorts. The formula that is used is as follows (N/C=G), "N" represents the number of students that graduated and the "C" represents the number of students that began in that particular cohort and the "G" represents the graduation rate.	7	47	Graduates are sent an electronic survey by the program director. The survey asks if they are employed. The calculation is made by taking the number of graduates employed by divided by the number of graduates.	9	63
Goodwin College	N/A as we have not completed a Goodwin University Funeral Service cohort in 2019.	0	0	The Office of Institutional Effectiveness measures the job placement/employment rates based upon 'placed in field or related' / '#grads - #uncontacted'.	41	61
Gupton-Jones College of Funeral Service	#of starts(calendar year)/# of withdrawals = graduation rate	65	95	# of Grads (calendar year)/3 of placement/employment (calendar year) = placement/ employment rate	65	80
Holmes Community College	Students that complete 50% of the degree courses are considered concentrators. Graduates divided by concentrators as per MS Community College Board.	9	91	Number of Students placed in the field divided by the number of graduates.	10	80
Hudson Valley Community College	previous calculation used the total number of senior students eligible due to fulfillment of academic requirements (NBE),compared to the actual graduates,divided into the total number of student that actually graduate from the program. Currently,with students eligible w/o NBE requirements are calculated by those students who are eligible to graduate by dividing actual graduates.	9	75	The total number of senior students eligible for graduation due to the fulfillment of academic requirements, compared to the actual number of students that actually graduate. The NBE requirement is no longer in effect for those matriculated as of fall 2017. A number of those students under prior requirement, still exist accountable once the NBE is successfully completed. Job placement will decline with new requirement - Graduation rate will increase.	12	83
Ivy Tech Community	Once a student is admitted to the selective mortuary science	13	87	Job placement is measured by the number of graduates	13	87

College	Graduation Rate Calculation			Employment Rate Calculation		
College of Indiana - Central Indiana	program, they have 1.5 X the degree length to finish. This equates to 4.5 semesters. (Ivy Tech offers 8 week courses.)			indicating they have obtained employment within 6 months of graduation on the graduate survey (or follow up) divided by the number of graduates		
Jefferson State Community College	The report will cover Fall 2017 to Fall 2019, no summer enrollment to the FSE Program. The graduation rate calculation is measured by what is listed in the standard 10.3.2. The students moving through the second half of the AAS degree program who would be considered to have graduated on time if they completed their degree within 18 months vs. the number of students that completed the FSE Program over 18 months. Half of the FSE Program is 33.5 hours, 67 hours to complete.	11	83	Annually, the Institutional Effectiveness department conducts a job placement survey. However, our students are employed at funeral homes during their enrollment in the FSE Program and prior to graduating. Also, note if a student loses employment while in the FSE Program we sometimes will assist with finding new employment.	28	92
John A Gupton College	From the point a student completes 50% of the program (30 sem hrs for AA and 31 sem hrs for AAS), the student must complete the entire program within 1 1/2 times the remaining length of program (which is 3 semesters)	19	63	The placement/employment rate for John A. Gupton College is calculated by the percentage of reported graduates working in funeral service or related field versus those that are not. These data are neither requested nor reported to another entity or entities.	30	80
John Tyler Community College	Once students complete the first year courses (General Education and Intro Funeral Services), they formally apply for full admission to the Funeral Services Program. Students who graduated in 2019 were all fully admitted in August 2018. Graduation rates are based on graduates that took 6 or fewer semesters to complete the program (150%).	12	100	At the end of the semester, graduating students are surveyed to determine whether they work in a funeral home.They are also asked to provide the contact information for their employer so we can contact them for the employer survey. Graduates are called within 6 months after graduation to follow-up on their employment.	12	100
Kansas City Kansas Community College	We track the number of enrolled with graduates each year. The program director keeps track of this data.	18	100%	We track the graduates with follow-up surveys by the institutional research department	18	77
Lake Washington Institute of Technology	Graduation rate is calculated by using the cohort tracking spreadsheet and dividing the number of graduates by the number that were at the 50% grad mark the previous year. This is reported to the Washington State Board Of Community and Technical Colleges	1	14	Employment rates are calculated by taking the number of students employed in funeral service or related field divided by the number of graduates for the year.This is reported to the Washington State Board Of Community and Technical Colleges	1	00
Malcolm X College	Students moving through the second half of an associate program will be considered to have graduated on time if they complete their degree within 18 months.	16	94	Employment within 6 months of the date of graduation.	17	88
Mercer County Community College	This is calculated on a three-year, rolling average. Previous three years of new enrollees minus the previous three years of graduates, from which a percentage is calculated.	40	79	The students are required to secure employment at a funeral home to complete the program. Data are reported to the Advisory Commission and to the Academic Division via the Dean.	43	100
Miami Dade College	To determine the Graduate Rate Percent the total number of graduates as indicated on the cohort tracking sheet was divided into the total number of students attempting the exit gatekeeper course FSE2930L - Professional Review.To determine Timely Graduation the total number of actual graduates for the calendar year is reviewed to determine the date they began the program to when they completed FSE2930L - Professional Review. Students who complete the program within 1 1/2 times the program length are divided into the total number of graduates.	31	76%	The Funeral Service Education Program program tracks students through graduate surveys, social media, employment surveys, personal interactions, & other notifications. The FSE program has ceased using the statistics reported by the Florida Education & Training Placement Information Program as of 2019 since it only tracks cohorts from seven years prior to the current calendar year and it does not represent a current job placement rate.	37	72
Mid-America College of Funeral Service	Cohort total start divided by number of graduates in cohort when graduation date is reached.	64	91.6	Divide the number of employed students by the number of graduates in the cohort.	65	90
Milwaukee Area Technical College	The graduation rate is calculated by dividing the number of graduates from the funeral service program by the number of students enrolled at the start of the given cohort.	16	94.1	Job placement is calculated by dividing the number of currently employed funeral service graduates by the number of funeral service graduates	16	16
Mt. Hood Community College	Take the students who graduated and divide by students who started the program as a 2nd year.Submitted to the college and the ABFSE.15/21	15	71	Take the students who are employed and divide by the number of graduates. The information is submitted to the ABFSE. 14/15.	15	93
Nassau Community College	Graduation rate is calculated using a 3 year or 6 semester completion of program. For evening students graduation rate is 6 years or 12 semesters.	30	96.7	Was the graduate employed just prior to graduation and did the employment continue after graduation.	31	94
Northampton Community College	The calculation is based on the enrollment of students in the original cohort enrollment vs. cohort graduates. This information is communicated with the divisional dean, vice president of academic affairs an the dean of students.	17	81	The calculation is based on the number of graduates vs. those employed in funeral service or related fields.	17	88
Northeast Texas Community College	Graduates of the A.A.S. in Funeral Service Education will be calculated by the successful completion of MRTS 1225-Thantochemistry. This course was selected on account of it being a science course offered early in the student's educational experience (second semester), and enrollment in this course would indicate an interest in the A.A.S. degree. Graduates are tracked from MRTS 1225 course completion through to graduation. We do allow students the opportunity to transfer to a different cohort, should they fail a course or need to change their schedule. If a student leaves or doesn't enroll for future program courses and has completed MRTS 1225, they will be counted as a student who was dropped or has withdrawn from the program. Calculation of Graduation Rate: (Number of students successfully completing MRTS 1225) = X (Number of students entering from a different cohort) = Y(Number of students transferring to another cohort) = Z X + Y - Z = Tracking cohort (Number of students who withdrew or were dropped from the program) = A (X + Y - Z) - A = Graduates (Graduates / Tracking cohort) * 100 = Graduation Rate. Graduation rates are reported to the ABFSE and institutionally during our 5-year program review.	3	60	Employment rates are calculated using graduate surveys and personal communications.Calculating Job Placement:(Students that indicate employment in funeral service through surveys and/or personal communications) = B (B / number of Graduates) * 100 = % of graduates employed in funeral service. Job placement rates are reported to the ABFSE and institutionally during our 5-year program review.	3	100
Northwest Mississippi Community College	NWCC utilizes the number of students who meet the 50% mark of the curriculum versus who actually graduate (versus dropping or selecting another major). There were 4 graduates and 1 student who is no longer in the program who did not graduate. 4/5=	4	80	NWCC utilizes the number of graduates employed in funeral service at graduation or 6 months post /after graduation. There were 4 graduates and 3 were employed. 3/4=	4	75
Ogeechee Technical	Graduation rates are based upon use of student cohorts. An	22	70.9	Job placement/employment rates are based upon use of the	22	100

College	Graduation Methodology			Employment Methodology		
College	identifying course FSRV 1020 Funeral Service Law & Ethics is used to determine the cohort. Students are considered graduates once they have completed all the required coursework, regardless of their NBE status. The graduation rate is calculated on a calendar year (spring, summer, and fall). The calculation method for graduation rates is the number of graduates divided by the number of graduates and leavers. This method of calculation is consistent with the method of calculation used by the Technical College System of Georgia in determining a state-wide graduation rate and for calculating individual graduation rates for each technical college in the system.			same cohort mentioned previously. An identifying course is used to determine the number of students who are in funeral service majors. The calculation method is the number of graduates placed in the field divided by the number of graduates. This method of calculation is consistent with the method of calculation used by the Technical College System of Georgia in determining a state-wide placement rate and for calculating job placement rates for each technical college in the system.		
Piedmont Technical College	Graduation rates are based on a calendar year. We calculate the number of students at the beginning of the calendar year to the number of students that have completed the program by the end of the same year. This information is submitted to the Institutional Effectiveness Office and reported on the college's and program's IPED's and SACSCOC reports.	14	82	We evaluate students six months after graduation to determine job placement rates. This information is submitted to the Institutional Effectiveness Office and reported on the college's and program's IPED's and SACSCOC reports.	14	79
Pittsburgh Institute of Mortuary Science	Graduation rates are computed for the US Department of Education via its IPEDS data collection process and submitted to USDE on fiscal year ending basis. The most recent rate is 92%. Graduation rates for ABFSE are calculated for students that complete the program within 150% for planned or anticipated graduation per the prescribed process of the ABFSE/COA but on a calendar year basis. The most current grad rate results are presented below.	90	92	Student surveys are conducted at the completion of the program to provide placement data. Follow up is initiated for students who do not have concrete plans in place at the time of graduation. Students continuing education are also vetted as many have secured positions but are delaying start date to pursue degree completion options.	93	95
Salt Lake Community College	In accordance to ABFSE Standard 11, students are calculated in the graduation rate once they complete 34 credit hours of the program (50% of total credit hours; end of second semester; Summer term). They are then tracked for completion of the program within the time allotted by ABFSE Standard 11. Once they have taken the NBE, confirmation is made with the Registrar's office that the student has completed all necessary requirements for graduation. A percentage is calculated based on the enrollment numbers. Data is submitted to College administration, Institutional Research and to ABFSE	7	100	Graduate surveys are sent six months after graduation. Employment data received from the survey is used to calculate employment rate. A percentage of graduates indicating employment in funeral service is calculated based on the total number of graduates. Those who continue their education or enter the military are not calculated in the employment rate per ABFSE standards. Data is submitted to ABFSE, SLCC Institutional Research and College administration.	7	86
San Antonio College	Graduation is measured by the completion of the National Board Exam.	24	100	Graduation is in practice and is enrolled in a four year degree.	24	69
Southern Illinois University	We start counting students when they enter their Junior year. When the senior year is complete we look back to see who started and who finished. We divide the number of finishers by the number of starters to get the graduation rate.	0.0	94.4	Approximately 6-7 months after graduation the graduates are contacted by the program director to see if they are employed and in what field. This gives us placement rates.	18	83
St. Louis Community College	Graduation rate is calculated by dividing the number of graduates to the number of those who do not finish.	10	100	Job placement rate is calculated by dividing the number of graduates employed by the number that are not. The program director calculates placement rates.	10	70
St. Petersburg College	18 out of 28 graduate within 1.5 years after reaching the midway point	18	64	26 our of 28 are employed by funeral home	28	93
State University of New York at Canton	Graduation rates are calculated using the federal government's definition. First-time, full-time degree seeking freshman in every year after 150% time has passed to determine the program's graduation rate. The numerator includes those students who completed the program on time or within 150% time of the program's start time, and the denominator indicates all students from the original first-year student cohort. 2019 is the first year when this measurement can accurately be calculated. For the purpose of this report, the FSAD program measures graduation rates from the time the student reaches 60 credits in the program to graduation. If the student started as a Freshman, they have 6 years to graduate from the program. If they start as a Junior, they have 3 years to complete the program.	19	82	The Program Director, using social media and personal contacts with the graduates, keeps track of where they are employed post graduation. He also assist the graduates with job placement.	19	83
Tidewater Community College	The graduation rate for the AAS-Funeral Service degree are calculated using the following methodology. The TCC Office of Institutional Effectiveness calculates graduation rates of selected programs. Two year and three-year graduation rates are based on a cohort of students admitted to the program during a particular semester. They are identified by enrollment into the programs entry courses (FNS 111, FNS 211, and FNS 231). All admitted students are included in the cohort, including students both attending part and full time.	9	64	Graduates are followed for a period of one-year following completion of the AAS- Funeral Service. If employment is obtained in a funeral service related field or if the student is on active duty military service they are considered employed. The number is compared to the total number of graduates to render a percentage of graduates employed.	11	64
University of Arkansas Community College at Hope	At the end of the calendar year, the number of graduates is calculated and divided by the number of new enrollees for the fall semester the previous year. This creates a cohort for that year. Graduation rates are submitted with with college data to state and federal Department of Education agencies.	5	55.5	Graduates are surveyed to determine if the graduate is employed in funeral service. The number of students employed in funeral services is divided by the number of graduates. This information is submitted to the Health Professions Dean and Vice Chancellor for Academics.	5	100
University of Central Oklahoma	Current graduation rate (considering how many students start v finish) is calculated using total enrollment for previous year report, subtracting students who left in current report year (based on ABFSE standard of students who have completed 50% or more of the program) and dividing to get percentage of students staying on path to graduate. This data may be evaluated departmentally and shared at the college level. It is also available here and for interested parties on the website or through request to our office.	23	97	Employment rates are measured by surveys and post graduation correspondence. Rates are calculated soon after graduation. Students employed in a non related field or not employed would be subtracted from graduate total for the year and the result is expressed as a percentage.	26	100
University of Minnesota - Twin Cities Campus	The programs graduation percentage rate is calculated as follows: At the end of each calendar year, the total number of graduates (x) is divided by the number graduates who completed their degree requirements within 1.5 times their program length* (y), to determine the programs timely graduation rate (z), as follows: $x/y = z$. Note: for students who	27	100	The programs employment percentage rate is calculated as follows: At the end of each calendar year, the total number of graduates (x) is divided by the number of graduates who are working in funeral service (y) to determine the programs employment rate (z), as follows: $x/y = z$	27	100

matriculate as juniors, 1.5 times program length is 36 months; for students who matriculate as sophomores, 1.5 times program length is 54 months. The program does not matriculate freshmen.

Institution	Graduation Rate Methodology	#	%	Placement Rate Methodology	#	%
University of the District of Columbia Community College	Six students began the program in Fall 2017. Three students graduated in December 2018. One student graduated May 2019. One student graduated December 2019. This information is submitted to our internal Office of Institutional Research.	4	83.3	Job placement/employment rates for our program are measured by graduate surveys, employment surveys, and student surveys. Data is submitted to our internal Office of Institutional Research.	5	·80
Vincennes University	Vincennes University utilizes the IPEDS method for graduation calculation based on 150% of time to graduation. The VU FSE Program was set at 5 semesters for the 2019 graduates. The students would have needed to complete the program in 7.5 semesters or less.	17	100	The VU FSE Program looks at the nimber of graduates who are employed in funeral service and compares that with those that are not employed in funeral service. A graduate survey is sent out within 6 months of graduation by the college's institutional research department and statistical information is collected from those surveys.	17	88
Wayne State University	The number of graduates (those who completed all coursework and took both sections of the NBE) from a cohort is divided by the total number of students who started the program in that cohort. Students continuing in the program,either by part time status or to repeat a course, are not included in the calculation.	22	96	Job placement is determined just prior to graduation. Students who do not report job placement prior to graduation are contacted again in January. The number of graduates employed is divided by the total number of graduates. Data is submitted to Advisory Committee as part of assessment process.	24	·100
Worsham College of Mortuary Science	Worsham offers a 12 month program, therefore, our new enrollees for 2018 are our graduates for 2019. There were a total of 60 new enrollees in 2018, and 53 graduates in 2019, 88%	53	88	Prior to graduation we ask students to complete an employment form giving us the contact information for the funeral home with whom they will be employed. For those students who have not yet found employment, we ask for electronic copies of their resumes so we can forward them to prospective employers. We follow up with these students three months after graduation.	53	89
